2024

Projects

1. Online Recruitment System

PHP, MySQL, JavaScript

- Developed a role-based recruitment portal where recruiters can post jobs and applicants can apply online
- Implemented user authentication, job filtering, and admin dashboard functionalities
- Designed and managed a relational MySQL database for users, applications, and job listings

2. Expense Tracker Web Application

HTML, CSS, JavaScript

- Built a personal expense tracking system to record, categorize, and monitor daily spending
- Implemented income and expense entry forms with dynamic balance calculations
- Used JavaScript and browser storage to manage and persist financial data
- Focused on clean UI layout and usability for real-world financial tracking

3. AI Portfolio Website

React, TypeScript, Three.js, GSAP

- Designed and developed an interactive portfolio website featuring a custom AI-powered knowledge assistant
- Built a dynamic technology graph using Three.js and WebGL to showcase technical skills and project relationships
- Implemented portfolio search and project discovery features through a custom knowledge engine
- Created a responsive futuristic user interface with smooth animations and modern design principles

4. Anime Release Tracker

React, Node.js, MongoDB, REST APIs

- Developed a full-stack anime tracking platform that allows users to discover, organize, and manage anime watchlists
- Integrated external anime APIs to fetch and display real-time anime information and release updates
- Implemented CRUD operations for watchlist management and personalized tracking features
- Built responsive user interfaces with React and connected them to a backend powered by Node.js and MongoDB

5. Amazon Homepage UI Clone

HTML, CSS, Responsive Design

- Recreated the layout and visual design of Amazon's homepage to practice real-world UI structuring
- Implemented complex header, navigation bar, product grid, and multi-section layout using Flexbox and CSS positioning
- Applied responsive design principles to ensure proper layout across desktop and tablet screen sizes
- Focused on pixel-accurate spacing, alignment, and component structuring

Achievements and Certification

- **Participant – Codemania'25 Coding Competition**, CHRIST University (Aug 2025)
Participated in a multi-domain coding competition involving algorithmic problem-solving and logical reasoning challenges. Solved time-bound problems requiring efficient thinking and structured approaches, improving coding proficiency and competitive problem-solving skills in a high-pressure environment.
- **Finalist – HackGenesis'25 International Hackathon**, CHRIST University (Sept 2025)
Selected as a finalist in a highly competitive international-level hackathon organized by the Technical Club of Sciences. Collaborated within a team to design and develop a practical solution addressing a real-world problem using modern technologies. Contributed to ideation, development, and presentation under strict time constraints, demonstrating problem-solving ability, teamwork, and technical execution.
- **Tech Explorer Job Simulation – Commonwealth Bank (Forage)** (Mar 2026)
Completed a virtual job simulation focused on real-world software engineering practices. Gained hands-on exposure to tasks such as analyzing technical requirements, debugging issues, and understanding system-level problem solving. Developed familiarity with industry workflows and strengthened practical knowledge of how large-scale tech teams approach development and decision-making.

Technical Skills

- **Languages:** PHP, JavaScript
- **Web Technologies:** HTML, CSS, React
- **Backend:** Node, express.js
- **Database:** MySQL, MongoDB
- **Tools:** Git, GitHub, VS Code, XAMPP, Vite
- **Other Technologies:** Three.js, REST APIs, Responsive Web Design
